

333 STATE LINES

The signing sequence shown in Figure 333-A shall be installed on all State highways as close as practicable to the State line. Where terrain or other conditions make it impractical to install the I2-1 sign at the State line, the I2 sign should be placed at that location and the I2-1 sign placed at the closest favorable location.

Where the State line crosses the center of a bridge, the I2 sign should be placed at that location and the I2-1 sign installed beyond and as close as practicable to the end of the bridge.

The distances shown in Figure 333-A shall be measured from the location of the I2-1 sign.
